

Programs and Tools I Highly Recommend

In this section I will be listing programs and tools that I use and ones that I especially recommend as being profitable, useful or otherwise valuable to the trader. Some of these are free, some have a one time charge, some have a subscription basis. Ral may be an affiliate of these programs and may benefit from any that are subscriber based. Any benefits received will be used to develop ralolB, raltools, and ralroom services.

- 1.Voice Thread. This is a site developed by mizan's brother and one I have chosen to subscribe to and use as an adjunct to ralroom. Become familiar and register with this tool at the main website by clicking on the link above. It is free.
- 2.Stockfetcher. This is a high quality search program with an easy to learn language for programming search criteria. I use this for finding Wake Up Call Strategy candidates as one example of it's use. Cost is \$24.95 per quarter.
- 3.Calendar Magic. A highly useful program for dealing with all aspects of time calculations: dates and times of lunar and solar events including eclipses. Just updated to version 17.3 It is free.
- 4.Fences. This free program from Stardock is a very effective way to organize the desktop
